

Optical Cable Dissolution Machine

Overview

Fiber Cable Stripping Machines are devices used to remove the outer jacket of fiber optic cables. The FiberOptic 7010 cuts and. Mechanical fiber strippers for Large Diameter Fibers (LDF) for removing various coating materials from windows and fiber ends. Our selection offers powerful, robust devices for single fibers and. Thorlabs' Vytran® product family is designed for fusion splicing, optical fiber processing, and end face geometry inspection. For splicing, connectorization or other processing, these coatings must be removed. Fiber strippers are precision tools that reliably and cleanly remove a defined length of coating. The AutoStripII is designed for fast, chemical-free window stripping of acrylate coated optical fibers. The PWS provides high performance polyimide coating removal from optical fibers in a partial vacuum. The FPU II, provides non-contact, chemical-free window stripping and end stripping of.
