

Optical Module JDS

Overview

The JDS Uniphase 2213-75SL RAM Module is designed for high-speed optical data transmission, featuring ultra-low latency and high data integrity in demanding industrial control applications. It is at the heart of any automated test system. The JDSU mOSW-C1 Optical Switch Module and mISW Optical Switch Tray are built on the industry-leading, fourth-generation instrumentation class of JDSU optical switch technology. The JDS Uniphase 2213-75SL RAM 072 optical module is engineered to meet the stringent requirements of modern. JDSU JDS Uniphase SFP-2125 Optical TX Transceiver Model JSMP21S002B01 SUN P/N 3705211-01 In good condition. Tested Included 1 x JDSU JSMP21S002B01 This is new with original product box. This is new with original. Artisan Scientific Corporation dba Artisan Technology Group is not an affiliate, representative, or authorized distributor for any manufacturer listed herein.
