

Optical cable for wireless radio frequency remote unit GJYFJH

Overview

The GJYFJH radio frequency remote fiber optic cable. The structure of the optical cable is using two or four single-mode or multi-mode fibers which directly covered with low-smoke and halogen-free material to make tight-sleeve fiber. Each cable uses high-strength aramid yarn as the reinforcing. Directly from Jingkon Fiber Communication, this GJYFJH wireless remote cable I delivers robust outdoor connectivity with professional oem manufacturer support and factory pricing. RFS is certificated against ISO 9001 and ISO 14001. A LSZH inner sheath is extruded on the tight buffered fibre to form an optical sub-unit. Then optical sub-units and fillers are stranded into a cable core. Buy directly for. This optical cable is applicable to the access of communication base. Flame retardant grade: Comply with OFNR specified by UL.
