

Panama Ic Yin-Yang type optical attenuator

Overview

These are fixed 20dB attenuators in the yin-yang (binaural) style with female to male connectors. They work at both 1310nm and 1550nm wavelengths with excellent return loss ($\geq 60\text{dB}$) and precise attenuation accuracy. LC SM Yin And Yang Type Fiber Optic Attenuator Without Ears 5dB Yin And Yang Type Fiber Optic Fixed Attenuator is one end of the connector type and the other end of the adapter type, and the attenuation value is adjustable. The attenuation value is adjustable. It does not introduce attenuation normally, but suddenly increases attenuation when encountering external interference. From the perspective of microwave networks, an attenuator is a. Fiber Optic Attenuator is one kind of optical passive device which is used to debug the performance of the optical power in the optical communication system, debugging fiber optic instrument calibration correction, optical signal attenuation. Chat with supplier now for more details. Networking professionals and fiber optic technicians, this 10-pack of LC/UPC attenuators is perfect for managing signal power in your fiber networks.
