

Pdxdm Integrated Distribution Box

Overview

This product is suitable for AC 50Hz systems with voltages up to AC single-phase 220V or three-phase 380V, and currents up to 250A. It provides functions such as line overload protection, short-circuit protection, and circuit switching for indoor lighting and power distribution. Our flexible distribution boxes enable reliable, decentralised signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required. High-quality materials and robust product designs ensure a reliable connection, signal transmission and power. Ideal for accessory circuits and overflow circuits from your main power distribution module (PDM), the compact HWB6 Series 58 V Hard-Wired Waterproof DC Power Distribution Box can hold three plug-in circuit protection components, including a combination of MINI® fuses, MINI® circuit breakers, and. Wiring diagram shows both PNP and NPN wiring. Actual units use PNP status indicator, NPN status indicator, or neither. Dimensions are shown in mm (in. 81 ft)]. Product Overview The XM series distribution board is designed for architectural lighting and small-power control circuits. It is widely used in various settings, including power plants, substations, factories, mining enterprises, hotels, apartments, high-rise buildings, ports, stations, industrial. The PDX and TSPE series modular distribution boxes are built for flexible indoor and outdoor applications, offering durable plastic and metal construction for enhanced safety and longevity. With wall-mounted and flush-mounted installation options, they adapt to various settings, ensuring reliable. Jiaozuo Dongfang Xiangsheng Electric Appliance Co., Ltd Founded in May 2004, with a registered capital of 10.9 million yuan, the company covers an area of nearly 50 mu, with a production plant area of more than 20000 square meters and more than 200 employees.
