

Photoelectric converter single-mode single-fiber FC interface 12

Overview

As a newly upgraded gigabit fiber optic transceiver with 25 years of experience, this single-mode single-fiber optical converter supports a transmission distance of 25 kilometers. It's suitable for a variety of network environments, including video surveillance systems. The Gigabit stand-alone Ethernet Media Converter provides cost-effective, entry-level media conversion between 1x10/100/1000Base-TX ports and 100/1000Base-FX ports. With its fixed configuration, deployments are just plug-and-play. The Fiber optical supports both multimode (SX) or single-mode (LX). Singlemode Fiber Optic Transmitters, Receivers, Transceivers are available at Mouser Electronics. This series of products realizes long-distance transmission of RS-232 or RS-485 or RS-422 through optical fiber. Fiber optic converters use optical. ZLAN9100 optical transceiver is a photoelectric conversion device that converts 10M/100M Ethernet electrical signals into optical signals or optical signals into 10M/100M Ethernet signals.
