

Pipeline tray nameplate

LoRawan outdoor base station

Overview

Pipeline identification labels come in a variety of OSHA-compliant colors. These visual markings cover compressed air, natural gas, radon vents, fire sprinkler water, and so much more. Labels are resistant to smudges, smears, chemical and water stains, and are easy to install. The most common way for labelling industrial fittings and equipment is placing identification nameplates with a suitable description on the respective element. Our identification plates are available in three basic material options: This wide selection of materials ensures that identification. The nameplate system enables standard-compliant labelling of pipelines and ventilation ducts as well as labelling in other fields of application such as in hospitals, schools, or office and service centres. The signs are available in various colours and materials and can also be individually. Custom laser-etched, engraved, and blank nameplates. Standard and custom valve tags with your desired material, shape, and colors. Label elevated pipes with self-adhesive markers easily and safely using our exclusive self-adhesive. Discover durable and customizable valve tags and fasteners designed to label and organize your valves efficiently. UV inks printed graphics on 125 microns high performance matt white polyester, over-laminated with.
