

R8000 optical module

Overview

The MP-8000-RX RF/Fiber Optic Receiver modules are designed to provide Optical-to-Electric (O/E) conversion of broadband RF signals over a frequency range of 10 MHz to 60 GHz. This module describes the command line interface (CLI) commands for configuring Optics on the Cisco 8000 Series Routers. Also, the supported keywords of a command vary based on the type of the optical module (coherent. An eSFP optical module is an SFP optical module that supports monitoring of voltage, temperature, bias current, transmit optical power, and receive optical power. Ensure that the optical power on the receive side is less than or equal to -5 dBm. Do not use short-distance. The Zinwave Uniwave 8000 Optical Module provides optical link between Uniwave 8000 Primary Hub and Secondary Hub or Remote Unit via fiber.
