

Reboot the fiber optic switch management port

Overview

Use the Console to confirm if the corresponding port is LinkDown using the show interface status command. Use the command to reset the faulty port. This document describes how to troubleshoot fiber optic interfaces by addressing some of the fiber optic module and cabling specifications. The information in this document is based on all Catalyst 9000 Series switches. Scope FortiSwitch and FortiGate. During the switch's boot process, all panel. We currently have the problem that our customer has an HA configured with two XGS2100 and after a restart / failover test one of the fiber ports remains down and thus the entire network is paralyzed. When you reboot a switch connected to a fabric, all traffic to and from that. If you power up 2 new 9300L switches disconnected, and then connect them together, they work.
