

Requirements from Mobile Communication Optical Cable Engineering Team

Overview

163 describes criteria for the installation of optical fibre cables defined in Recommendation ITU-T L. 110 in remote areas with lack of usual infrastructure for installation including the procedures of cable-route planning, cable selection, cable-installation. Optical Fiber Cable engineering construction refers to the process of designing, planning, executing, and maintaining communication system infrastructure by deploying optical cables and associated components. Optical fibre cable for Coastal Areas & High. Work covered by this Section shall consist of furnishing labor, equipment, supplies, materials, and testing unless otherwise specified, and in performing the following operations recognized as necessary for the installation, termination, and labeling of horizontal optical fiber infrastructure as. Users of this publication are encouraged to participate in the development of future revisions. Line Drawings and Illustrations.
