

Rooftop network cable tray

Overview

Rooftop cable tray supports various cable runs with self-splicing covers, eliminating splice needs for easy rooftop protection. Rooftop cable trays are an essential component for organizing and managing electrical cables in commercial and industrial buildings with rooftop. As buildings contain more and more devices and systems requiring structured cabling, the need for sturdy cable tray supports is growing. Layout isolation pads, (provided by contractor), according to the design and layout. Insert legs of duct support into bases and attach with 2-1/2" bolt and 1/2" nut. Thanks to its robust construction and material, manufactured from high-quality steel with an EZ1000 surface treatment, RoofSupport ensures a safe and durable installation that meets the highest. Cable tray support systems are structures designed to uphold electrical cable runs on flat or sloped roofs. Traditionally, facilities have chosen to bundle cables and rig them up in a way that offers little protection, or run cables through a tube-like electrical conduit system, which make it. The Roof-Pro range of cable management solutions is suitable for supporting the following: For smaller cable volumes, Roof-Pro's TAB-C support utilises a single, broad base that provides effective and non-penetrative support for tray and ladder runs.
