

Russian Optical Line Terminal 100G

Overview

GP5810-08 OLT is a highly integrated, large-capacity XG (S)-PON OLT for operators, ISPs, enterprises, and campus applications. The product follows the ITU-T G. 988 technical standard, and can be compatible with three modes of G/XG/XGS at the same time. Explore our range of high-quality GPON, EPON, and XG (S)PON OLT products. Find the perfect Optical Line Terminal solutions for your network needs. Pluggable coherent optic transceivers integrate all the functions needed in a digital coherent optic (DCO), including the coherent digital signal processor (DSP), the optics needed for light transmission, modulation and detection, and the microprocessor electronics for turn-up and operation. All. At the heart of a point-to-multi-point or passive optical network (PON) is the optical line terminal (OLT). Modern OLTs offer communication service providers (CSP) the ability to launch multigigabit services to tens of thousands of subscribers from a single location or just ten.
