

Smart DC power distribution units for IoT cabinets

Overview

Specially designed for high-density telecom cabinets and edge computing, our compact smart DC power distribution unit provides comprehensive "monitoring and control" across 10 individual output channels in a slim 1U form factor. DPD panel is used to provide additional load MCB's. Each MCB have it's own current measurement and contactor for remote control and energy measurement with Delta's advanced controller. The. The 1U base station DC load intelligent management unit is an intelligent switch device that is carefully designed and manufactured based on the power consumption of the tower base station, combining advanced power metering dedicated chips with mature power management technology. This technology increases efficiency, improves reliability, and reduces operational risks for telecom operators.
