

Special Relay Protection Card

Overview

These DC to DC solid state relay card are available in 2-channel / 4-channel / 8-channel space saving din rail versions. Protected SSR card are having short circuit, over load protection and open load detection with fault indicator for individual channels. General purpose switching cards fitted with 25, 32, 50 or 64 high quality reed relays. Select modules are supplied with our. GE Vernova's Protection, Control, and Metering solutions deliver precise, high-performance automation for today's evolving grid. From advanced relays to multifunction meters, our portfolio helps utilities enhance reliability, streamline operations, and accelerate the energy transition. It provides potential-free contacts at the outputs, which can be configured optionally as N/O or N/C contacts and which can be used as binary input for the SPS or building control systems. Tapping occurs via a sub-D-slot and, in.
