

Swiss Solution DAC High-Speed Cable 1G

Overview

1G SFP Passive Copper Twinax Cable is individually tested on corresponding equipment such as Cisco, Arista, Juniper, Dell and other brands, and passes the monitoring of FS. COM intelligent quality control system. The Wire Gauge can be customized if it is required, like AWG26. Based on the resources of one of high end's most distinguished design companies, the swisscables product range offers truly innovative technical design and sonic merits at a groundbreaking price-performance level, manufactured to the highest standards in Switzerland. Swisscables - signal-and. Direct Attach Copper (DAC) cables are factory-terminated twinax assemblies that integrate transceiver-style connectors such as SFP/SFP+, SFP28, QSFP+, QSFP28, QSFP-DD and OSFP at both ends, creating a cost-effective, zero-power electrical link for short-reach, high-speed networks. This cable is compliant with SFF-8472, SFF-8024, and SFP+ MSA. With these features, this easy to install, high speed, cost-effective direct attach copper twinax cable is suitable for short-distance. The SFP passive cable assemblies are high performance, cost effective I/O solutions for 1G Ethernet and 1G Fiber Channel applications. SFP copper modules allow hardware manufactures to achieve high port density, configurability and utilization at a very low cast and reduced power budget. Discover how our High-Speed Connectivity Solutions can empower. The SWISS DAC HUB unites Swiss government, operators, and industry to advance Digital Automatic Coupling in freight transport — a groundbreaking innovation set to transform logistics across Europe. We are ready for DAC! Enotrac supports DAC systems with decades of experience in railway vehicle.
