

Thickness of the construction power distribution box body

Overview

Therefore, the thickness of the sheet metal of the cabinet body of the power electrical distribution box is usually not less than 1. ABB Mini Center Compact distribution board is the basis for development and growth in meeting all the demands for a successful future in residential. The criteria for selecting the thickness of the sheet metal for the electrical distribution box cabinet are mainly based on the following aspects: ### Type and Purpose of the Electrical Distribution Box - **Lighting electrical distribution box**: It is usually used to control and distribute the. 4 KV Substation of the ratings indicated above. These Distribution Cabinets are to be outdoor type and to be fabricated out of 2 mm GI sheet steel. The body of the boxes shall have sufficient re- enforcement with suitable size of channels keeping a provision for fixin andle conforming to general. IEC 61439 / EN 61439 shows how a low-voltage switchgear assembly, which is safe for the user, can be built. To extinguish the arc immediately in iso ators, in each phase arc-chutes with minimum 12 strips type.
