

Uruguay Aggregation Switch

Overview

Equipped with all-fiber ports, Aggregation Series Switches deliver up to 10 Gbps. With advanced features such as Static Routing, DHCP Server, ACL, IGMP Snooping, STP, LAG, and centralized cloud management, they offer a robust and reliable solution for the aggregation layer of SMB networks. Festa offers business-class features with consumer-inspired simplicity. Our free cloud-based centralized management is accessible via the Festa app or web, providing essential features for small businesses without the complexity required by larger-scale operations. Select models. Easily Build a Whole 10G Multi-gigabit Network Software Defined Networking (SDN) with Cloud Access Remotely manage your access points, switches, and gateways across multiple sites all from a single interface. † These functions require the use of the Omada SDN Controller. Zero-Touch Provisioning. Designed for workgroups and departments, TL-SG5412F from TP-LINK provides full set of layer 2 management features. Moreover, 10G Lightning-Fast Uplink: 4× 10 Gbps SFP+ slots enable high-bandwidth connectivity and non-blocking switching capacity.
