

WYAp distribution box means

Overview

A distribution box, or DB box, is a circuit breaker enclosure. It is a vital part and central hub of any electrical system. The hub distributes electrical power from a single input source to various circuits throughout a building. Its primary roles are distribution, protection (using devices like. A Wireless Access Point (WAP) is a networking device that allows wireless-capable devices to connect to a wired network. Instead of using wires and cables to connect every computer or device in the network, installing WAPs is a more convenient, more secure, and cost-efficient alternative.) with connectivity to a wired local area network (LAN). In practice: Unlike a wireless router, which combines routing, switching, and wireless. Wireless Distribution System (WDS) allows you to connect multiple access point devices and have them communicate with one another wirelessly.
