

What is the mesh cable tray on the server rack called

Overview

Channel Cable Management Trays, also known as cable trays or wire mesh cable trays, are designed to organize and protect network cables within server racks and cabinets. Two types available - 30 mm and 60 mm of depth. Equipment designed to be placed in a rack is typically described as rack-mount / rack-mountable, a rack-mount instrument, rack-mounted system, or rack-mount chassis. The rack may include subracks or shelves. It has adjustable pivots that allow the rack to be locked into a closed or open (90-degree perpendicular) position. GFCI Plug is a type of. Cable mesh (EzyMesh) is a metal wire basket style product suited to interior installations and allows for cable drop outs anywhere along its run. This helps make it an ideal solution for working around complex sites such as computer server rooms or other areas where there is complex machinery.
