

What is used to cut the steel wire of optical fiber cable

Overview

Cable Cutters: Used to cut through the outer sheath and strength members, such as Kevlar. Fiber Optic Cleaver: A high-precision instrument that creates a clean, perpendicular cleave necessary for low-loss splicing and. Fiber Optic Strippers: These tools are specifically designed to remove outer jackets and buffer coatings without harming the core fibers. Sharp-edged slots in the jaws. The blade is made of high hardness alloy steel material and undergoes precision grinding treatment to ensure smooth and burr free cutting edges, effectively avoiding damage to the optical fiber during the cutting process. Here are some additional materials suitable for cutting: Fiber optic cable preparation is a potentially hazardous activity. Spring-assisted jaws open automatically when you release the handles. There will be Kevlar fibers protruding, as well as two or three.

Fiber-Optic Cable Cutters | McMaster-Carr

With high-carbon stainless steel blades, these scissors cut through fiber-optic and electrical cables, even those that are made with Kevlar. They're also good for cutting wire jackets and cable ties. Use the

Jun 13, 2026

Wire & Cable Cutters, Fiber Optic Cable Cutter or ...

A wide selections of cable & wire cutters such as fiber optic cable cutters, network cable cutters, fiber optic kevlar scissors & cutters. Buy high quality fiber cutters with 1-2 days delivery to worldwide and

Oct 05, 2025

Wire Cutters For Optical Fiber Wire | McMaster-Carr

Cut cleanly through the thin optical fibers found in fiber optic cable, including those protected by Kevlar, without building up electrostatic discharge (ESD). Made of tungsten carbide, the blades on these

Feb 28, 2026

How to Cut Fiber Optic Cable?

Learn how to safely and accurately cut fiber optic cables using the right tools and techniques for optimal performance.
