

What materials should be purchased for the distribution box

Overview

You can find distribution boxes made from various distribution box materials such as steel, aluminum, PVC, polycarbonate, high-density polyethylene, and thermoset plastics like SMC. Each distribution box material has its own special strengths. Since distribution boxes house critical electrical components, they must be designed to withstand various environmental. Due to their application in electrical systems, the material composition of Distribution Boxes has performance requirements that need to be met in order for the box to be compliant to Axis Quality Control and customer requirements. The major requirements are as follows: 1) Flame retardant with Glow. The box material of Distribution box is generally made of steel plate, insulation board or epoxy glass cloth board.
