

Wiring Method for Outdoor Distribution Boxes in Germany

Overview

Check for proper IP/NEMA ratings and material quality. Ensure safe placement: install in dry, accessible areas with good ventilation and at appropriate height (typically ~1.5m). Marvel at their skilled use of tools like hydraulic crimpers. Witness the DIN VDE 0100 is an erection requirement and specifies which requirements a junction box must fulfil in specific installation areas. To guarantee a safe device installation, all these factors must be checked in individual cases and observed during the selection. Installation in external areas. AWG – American Wire Gauge is a code used for cable diameters and cross-sectional areas. It is important to understand exactly what is. Our flexible distribution boxes enable reliable, decentralised signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required.
